Mickeias Charles de Oliveira Paiva

Software and Artificial Intelligence Developer and Architect

+55 (21) 97099-2766 | contatomickeias@gmail.com | Linkedin | Portfolio | Github | Credly | Hugging Face

RESUME

Software and AI Developer and Architect, with experience in applied Artificial Intelligence, including Machine Learning, Neural Networks, Deep Learning, data exploration and analysis, and the development of intelligent solutions. I also work with Full Stack development, covering frontend, backend, databases, and systems integration, as well as software quality and QA through both manual and automated testing. I have experience with Git, version control, and agile methodologies. In addition to my technical background, I pursue design as a hobby, which contributes to my product mindset, UX/UI perspective, and ability to build more complete solutions.

Currently pursuing a bachelor's degree in computer science at the Catholic University of Brasília (UCB).

SKILLS

Python, Pandas, Numpay, Scikit-learn, Jupyter Notebook, TensorFlow, Pytorch, MLops, Machine Learning, Deep Learning, Neural Networks, EDA, Regression, Recommendation Systems, Clustering, JavaScript, TypeScript, Java, Dart, C, C#, C++, COBOL, Assembly, SQL Python, Machine Learning, Swift, HTML, CSS, Flutter, React, Angular, Node.js, RobotFramework, APIs REST, AWS, Postman, Workbench, Apache, Docker, Replit. Arduino IDE, Git, GitHub, Visual Studio Code, JetBrains, Programação Orientada a Objetos (POO), Estrutura de Dados, UX/UI, Agile, SCRUM, Kanban, Maestri.

EXPERIENCE

Artificial Intelligence Resident — *August 2026 – Present*

Instituto de Pesquisas Eldorado

Developing cutting-edge solutions applying Machine Learning, Deep Learning, and Neural Networks. The program integrates MLOps practices on cloud platforms, covering the lifecycle from training to deployment, with validation guided by rigorous algorithmic performance metrics.
Project developed:

- ✓ **FOMO.VeritAI**
  FOMO is a news platform where the VeritAI AI gathers and classifies evidence for factual claims prior to any publication. The final decision is always made by a human reviewer, delivering the article to the reader with full transparency regarding the supporting sources.
- ✓ **Beatfy**
  A music social network integrated into the Spotify ecosystem, where users can rate songs, post reviews, and interact with the community. The platform utilizes Machine Learning to personalize the feed and recommend new songs based on each user's profile and preferences.

Full-Stack Developer Intern — *August 2026*

CAIXA Econômica Federal

Development and maintenance of web applications, working across both front-end and back-end systems. Responsible for implementing features, integrating APIs, working with databases, creating and executing automated and manual tests, using Git for version control, and collaborating with Agile development teams.

Full-Stack Developer Intern — *July 2026*

INFRA S.A.

Development and maintenance of web and mobile applications, working across front-end and back-end systems. Implemented new features and created and executed automated and manual tests to ensure application quality.

Project developed:

- ✓ **INFRA-TESTER**
  Desktop executable software designed to run automated tests using Robot Framework.

Full-Stack Resident Developer — *August 2024 – June 2026*

Porto Digital

Developed user interfaces and back-end configurations for web and mobile applications. A letter of recommendation was issued upon completion of the residency.

Project developed:

- ✓ **InsightPro (Intech)**
  Developed the interface for a system that enables users to view their BI dashboards in a secure multi-tenant environment with sharing capabilities;
- ✓ **MOV (Azzz)**
  Developed the interface for a preventive monitoring system designed to help prevent cable theft and vandalism in underground infrastructure;
- ✓ **LUMA (Ideia Space)**
  Educational platform that teaches space engineering interactively, allowing users to explore the architecture of a nanosatellite and simulate a space mission

Graphic Illustrator — *January 2023 – June 2024*

Worked as a freelance graphic illustrator, creating digital artwork using Adobe Illustrator.

Telemarketing Intern — *July 2019 – August 2019*

GlobalTec Soluções em Informática LTDA

Worked in customer communication and telemarketing, providing information through the company's internal systems.

EDUCATION

Computer Science *Bachelor* — *August 2024 – Present*

Catholic University of Brasília (UCB)

IA Residency *Specialization* — *August 2026 – Present*

University of Brasília (UnB) | Instituto de Pesquisas Eldorado

GCI World 2026 September *International Techincal and Pratical Course* — *September 2026 – Present*

University of Tokyo | Matsuo-Iwasawa Laboratory

VOLUNTEER

Community Coordinator — ***August 2026 – Present***
AWS Student Builder Group at UCB

Student Ambassador — ***August 2026 – Present***
Google

Front-End Development Teaching Assistante — ***March 2026 – July 2026***
Catholic University of Brasília

RECOMMENDATIONS

"As a manager, I highly recommend Mickeias. He is incredibly quick to pick up tasks and very proactive about delivering things that weren't even requested. He really impressed us here at Infra; we were swamped with work—I was onboarding him and planning to assign tasks amidst a busy schedule of meetings when he identified a specific need we had and developed a testing bot for us. It was fantastic! Wishing you great success in your future professional endeavors." **— Lorena Viana (SUPTI Team Manager at INFRA S.A.)**

"Mickeias is a professional dedicated to learning and committed to his professional development. He will certainly be of great assistance to companies in implementing methods and improvements within the technology sector." **— Douglas Franco (IT Coordinator at CAIXA Econômica)**

"Mickeias is an extremely proactive professional. I had the pleasure of working with him on the same team, where he always delivered great work with creative solutions for various topics. This attitude had a very positive impact on our projects. I highly recommend him for any team!!!" **— Leo Alec Marquez (AI Resident)**

PERSONAL PROJECTS

ListBeat

Offline music catalog application inspired by Letterboxd that allows users to register, rate, organize, and manage songs and albums through lists, comments, and filters. Developed as a personal music collection management application. (***Featured Project at HackaTruck Brasília 2025.***).

QRex

Free QR code generator developed in Python with no expiration date. The tool enables users to quickly and easily generate QR codes from text, links, and other types of information.

Function Point Budget Calculator

Personal web-based tool for estimating software development costs and timelines based on the IFPUG Function Point Analysis methodology, including automatic PDF proposal generation.

COURSES

English — *Centro Interescolar de Línguas do Guará* — ***2014 – 2017***

Graphic Design and UX/UI Design Ultimate — *Udemy* — ***2022***

Java — *Udemy* — ***2024***

Technology and Sustainability — *Catholic University of Brasília* — ***October 2024***

Contemporary Educational Technologies — *Catholic University of Brasília* — ***October 2024***

Pandas with Python for Data Analysis — *Catholic University of Brasília* — ***October 2024***

KANBAN Lego Games — *Catholic University of Brasília* — ***October 2024***

TIC em trilhas, Collaborative Development with GitHub and Scrum — *Catholic University of Brasília* — ***November 2024***

Algorithms and Object-Oriented Programming with Swift — *Eldorado (HackaTruck MarketPlace)* — ***February 2025 – March 2025***

Cloud Services Practices Using Swift with an Emphasis on Cognitive Services — *Eldorado (HackaTruck MarketPlace)* — ***April 2025 – May 2025***

Graphic Design Fundamentals — *Udemy* — ***June 2025***

SEI! USAR 4.0 — *ENAP* — ***July 2026***

Fundamentals of the Brazilian General Data Protection Law — *ENAP* — ***July 2026***

Google AI Essentials (5 courses) — *Coursera* — ***August 2026***

Scrum Fundamentals — *CAIXA Econômica Federal* — ***August 2026***

Basic Big Data — *Federal Institute of Minas Gerais (IFMG)* — ***September 2026***

Google AI Fundamentals — *Coursera* — ***October 2026***

Visual Narratives with AI — *Brazilian Space Agency (AEB)* — ***October 2026***

Introduction to Optimization and Revolutionary Computing - Learning from Nature: Bio-inspired Algorithms — *Samsung Ocean* — ***October 2026***

ADDITIONAL INFORMATION

- *Champion of the Proplayer Call of Duty Brasil Internal Championship 2022.*
- *Experienced Graphic Illustrator using Adobe Illustrator and Adobe Photoshop since 2020.*
- *Developer of Hubbies, a featured project at HackaCriativa 2025.*
- *Served as Scrum Master in university residency projects conducted in partnership with Porto Digital from 2024 to 2026.*
- *Member of the Brazilian Computer Society (SBC — Sociedade Brasileira de Computação) since 2026.*
- *Member of the Association for Computing Machinery (ACM) since 2026.*
- *Candidate with excellent performance in POSCOMP 2026 (Brazilian National Exam for Postgraduate Studies in Computer Science): Scored 63/70 (90%).*
